**Additional comments**

Need to resolve IT issues. Injection laryngoplasty repeated throughout. 2 lectures (possibly 3)

The time we spent doing laryngoscopic injection was not enough otherwise it has been a very nice and interesting course

I consider 2 day course! Too much time for transcutaneous injection. Too little time for thyroplasty and laryngoscopic injection

Excellently co-ordinated course. Excellent range of speakers and practical opportunities. Refreshing and beneficial to have details

Concise, well-defined; However would like more comprehensive functional evaluation & more advance techniques to be demonstration, like lasers, radiofrequency

The question of "thyroplasty or injection medialisation was not fully addressed

Very well organised and presented

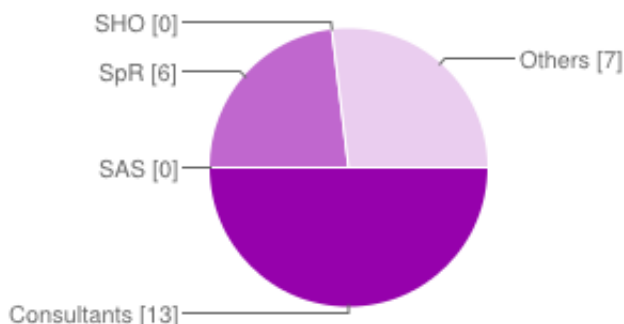

Better if trainees and consultants in different groups for hands-on

I would suggest more time on laryngeal framework session

Just excellent

Slightly too repetitive with the two injection lectures. Excellent lectures. Would highly recommend
