Additional comments

It will be nice to know that the surgical simulation skills is in stop ford building. I found myself lost on my way here

Can't fault anything. I really enjoyed this course and the way it was organised. Excellent course; congratulations

Some longer lectures could be shorten & more dissection time given but generally very happy with items covered & cadaver dissection

Can all powerpoint that are not included in the memory stick be sent to us through email ? Since a lot is missing

Very good course. Excellent faculty. Thank you

Temperature too hot at the lecture hall Other techniques for fat harvest

It was great. Just to improve I would suggest to add to some surgery about benign vocal fold lesions, but it was amazing, thanks.

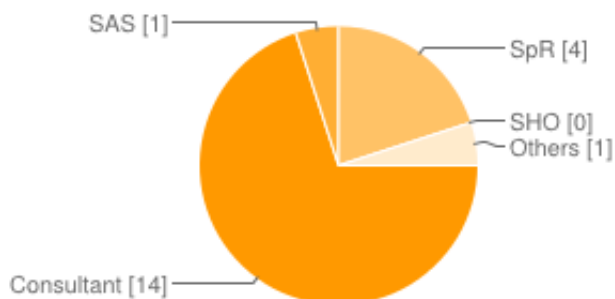

Keep it up May be to consider 3 days Hot food will be good More time for dissection

Excellent Faculty. Specimens: Best dissection specimens I've ever used

The university way for the course is confusing

OUTSTANDING COURSE. MAYBE UNEDITED VIDEO INSTEAD OF LIVE PATIENTS
