Your grade

Additional comments

Thank you. Embalmed cadaver and porcine larynx not ideal. But grateful for the experienced faculty who make up for this

Excellent trainers and faculty and equipment. Extremely enjoyable course, thank you

Live surgery will help to understand more how to transform information to real practice.

More practice days is another option. I am keen to learn more skills and operation which is our goal in this course. Thanks for the help

Poor quality of anatomic material. Too little time for so many skills

The small monitor can be attached to a larger screen for better viewing when demonstrating laryngeal procedures injection technique, glottoplasty etc. Excellent course. Enjoyed the arrangements, dissection and the lectures

EMG could have been more practical (less theoretical). Enjoyed practice injection medialisation most

It was an excellent course I have enjoyed it than you.

Practical tips for a voice clinic set-up. I don't know the embalmed given offered much given not fresh

better with fresh frozen cadaver. Explanation each bit and then dissection, too much technique and demonstration at a time

Great course ! Thank you

Nothing on laryngeal web. Would it be possible to have something on this ? As faculty stated would have been better with fresh cadavers- understand that this was not possible. Thank you to the faculty and Tracy for organising an excellent course

Faculty

IGL- Isabel Garcia-Lopez

YK- Yakubu Karagama

AG- Ahmed Geneid

TS- Tetsuji Sanuki

GFV- Gerhard Fabian Volk

DF- Doreen Fiahlo

JPM- Jean-Paul Marie

KH- Kate Heatcote

NW- Natalie Watson
