

## Delegates Feedback

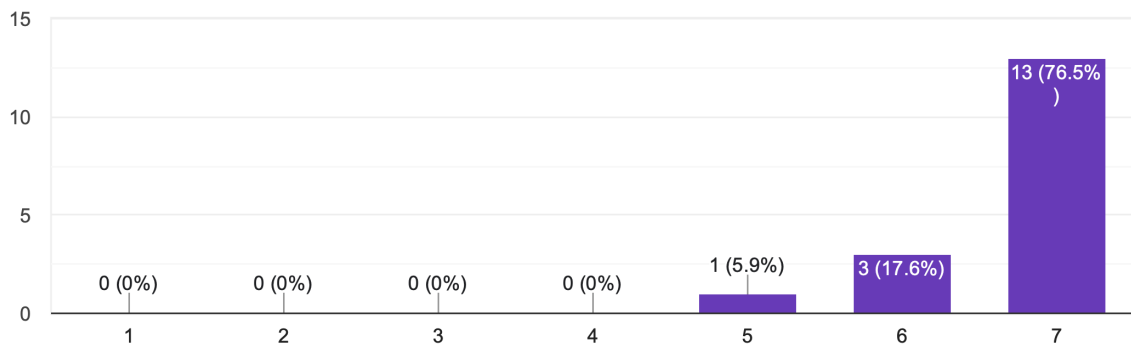

2nd London Laser and Laryngeal airway dissection course 5-6th Sept 2022

7- Extremely satisfied

1- Less satisfied

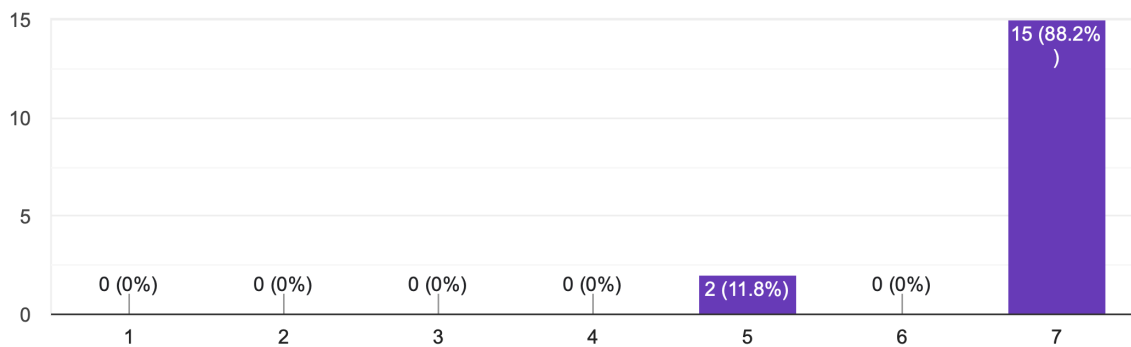

The aims of the meeting were well defined

17 responses

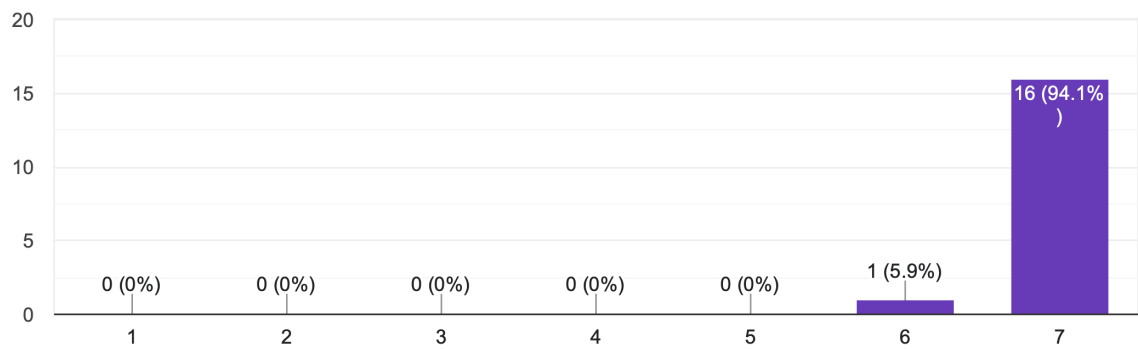

The defined aims of the meeting were achieved

17 responses

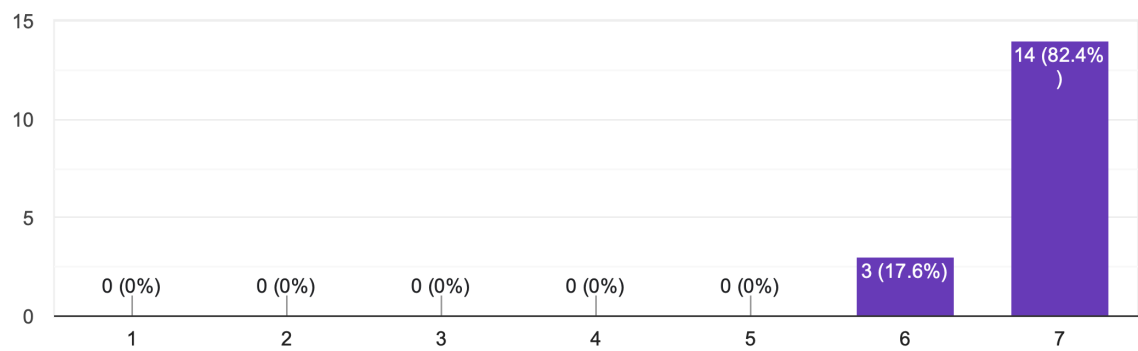

### The meeting was well organised

17 responses

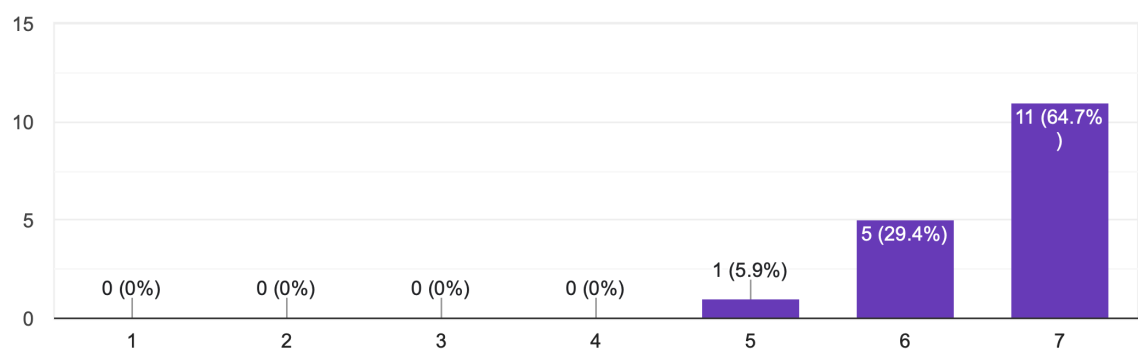

### The course fulfilled my educational requirements

17 responses

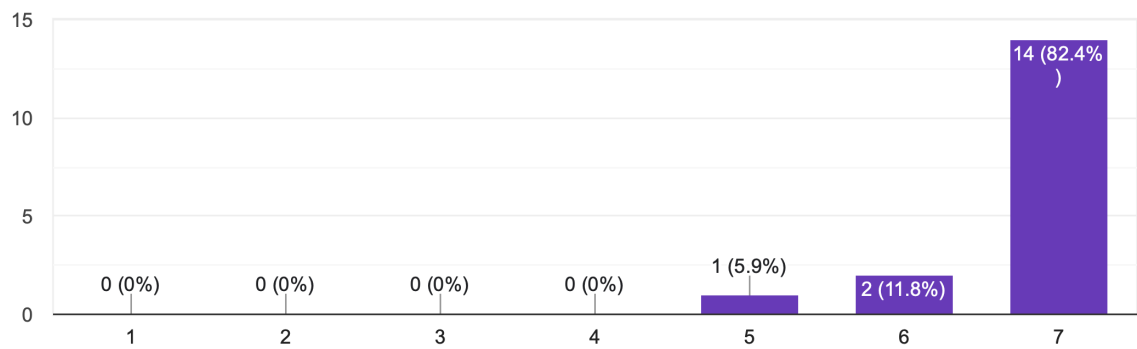

### Laser safety & Certification- M.Draper

17 responses

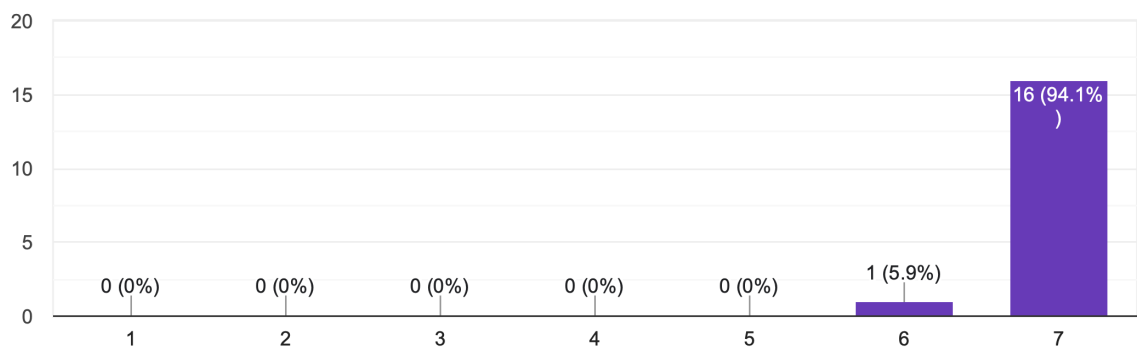

### Anaesthesia in airway surgery A.Wilson

17 responses

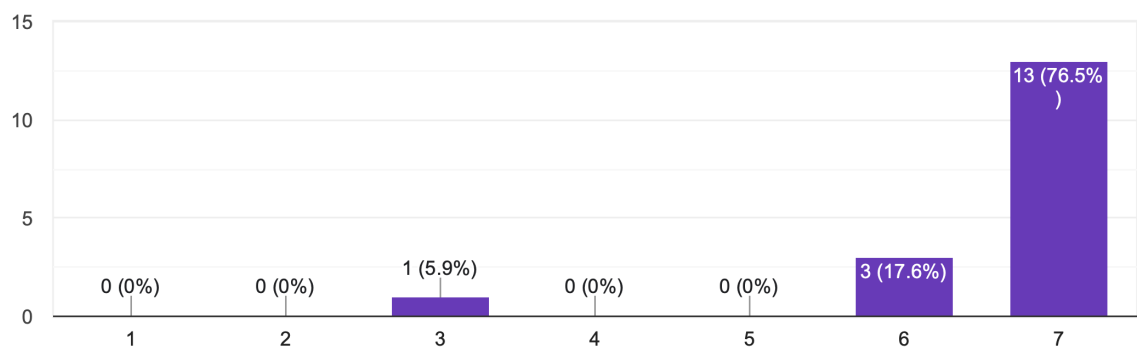

### Basics of laser, microlaryngoscopy & instrumentation- M.Watson

17 responses

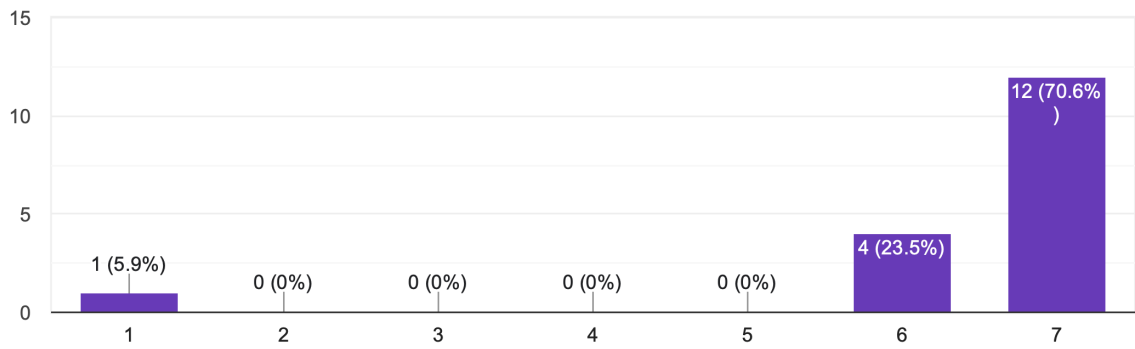

### Posterior glottic stenosis- K.Sandu

17 responses

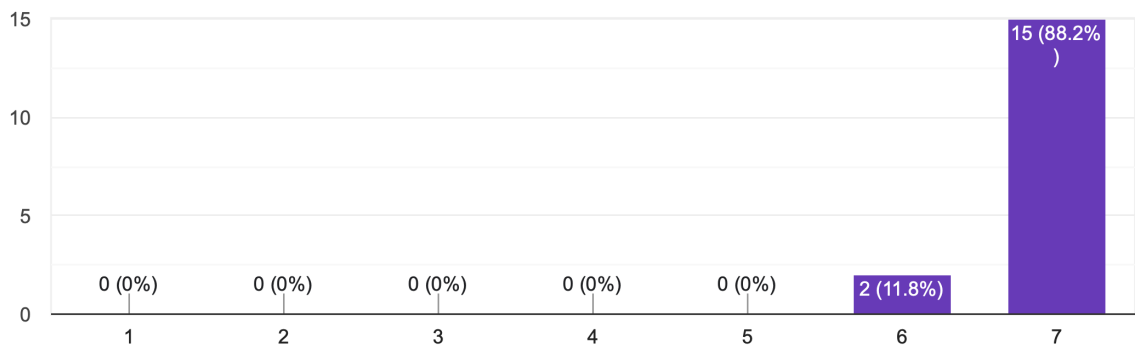

### Cricotracheal resection- K.Sandu

17 responses

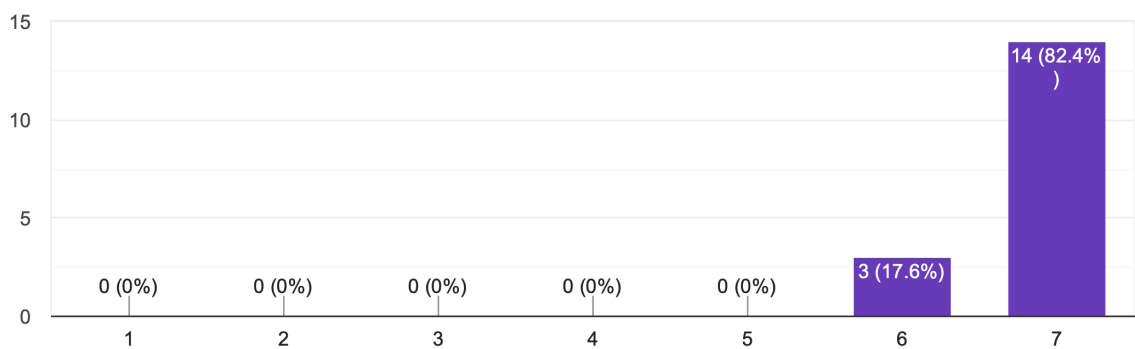

### Endoscopic management Laryngotracheal stenosis- C.Al-Yaghchi

17 responses

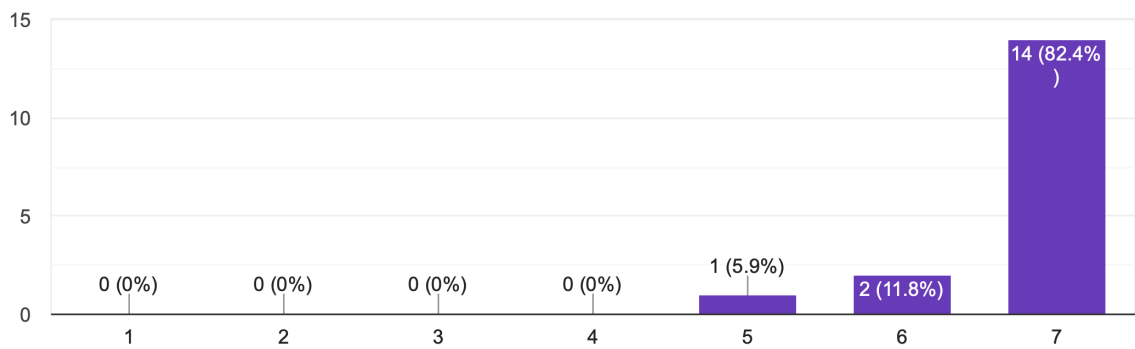

### CO2 Laser Glottoplasty- C.Al-Yaghchi

17 responses

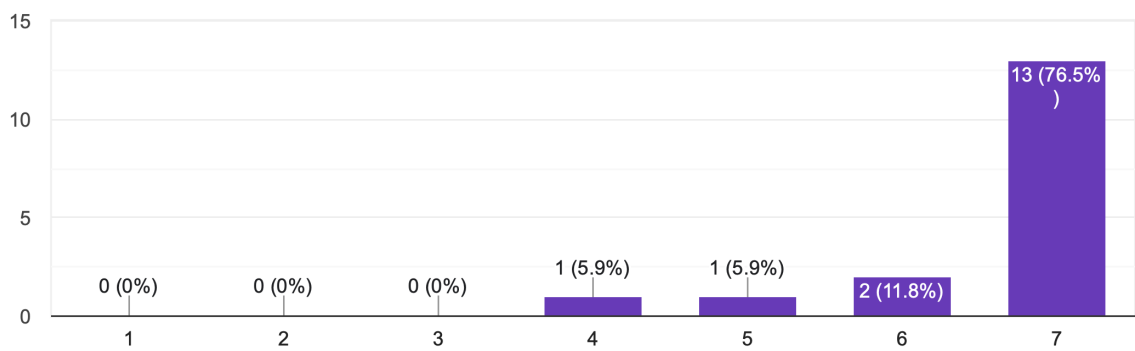

### Laryngotracheal stent- K.Sandu

17 responses

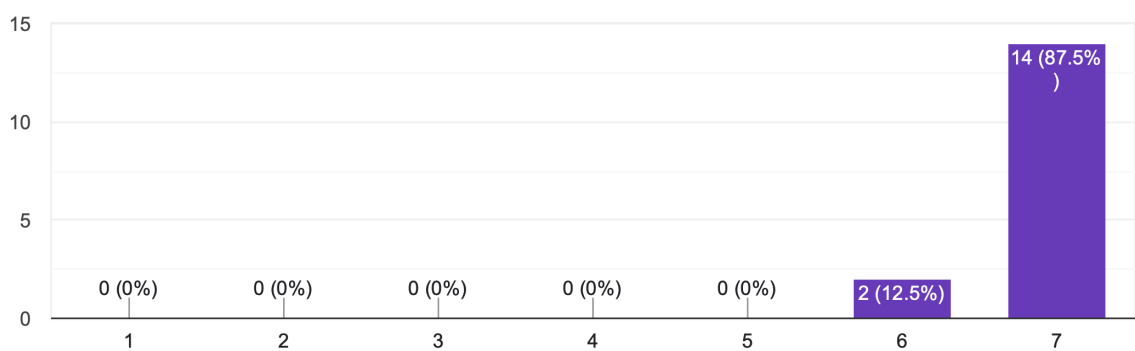

### Blue laser office procedure- N.Watson

17 responses

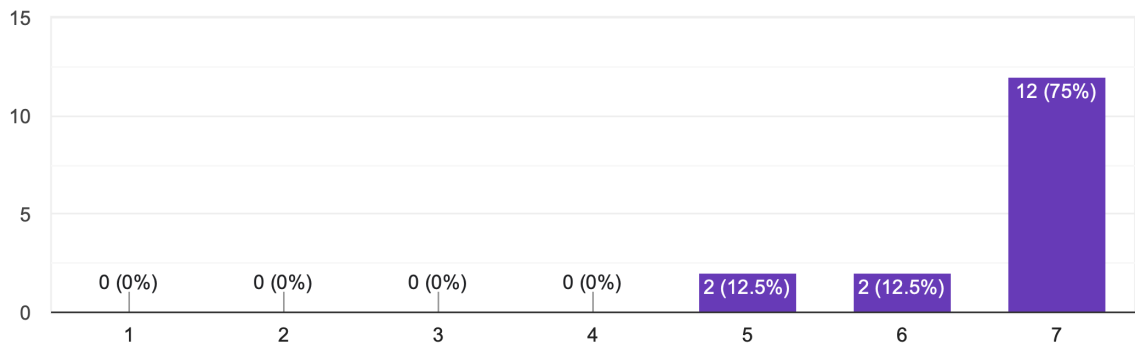

### CO2 laser TA myoneurectomy-Y.Karagama

16 responses

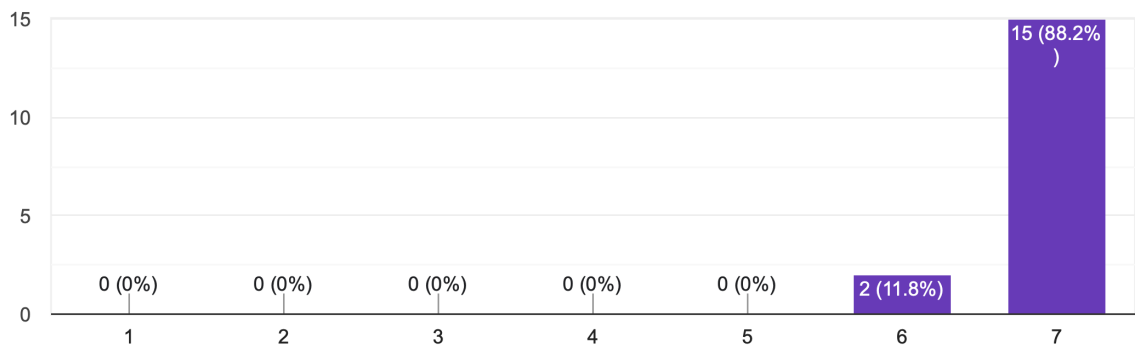

### Sulcus and Scars- N.Gibbins

16 responses

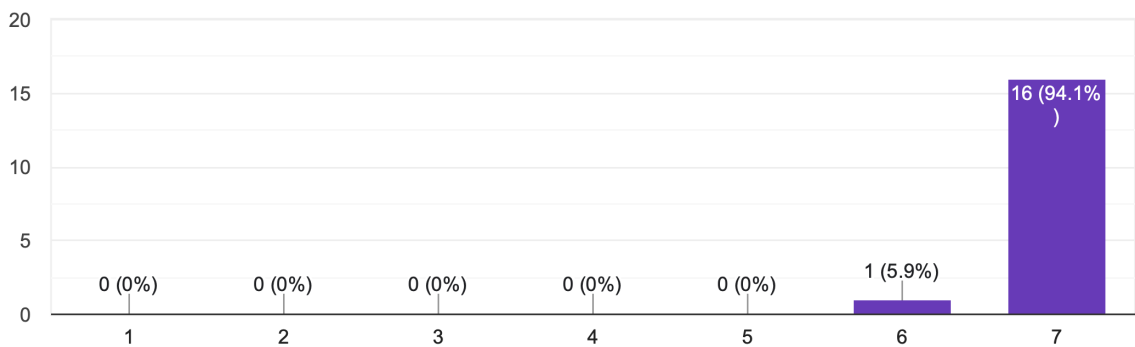

### LTR & Rib graft- C.Pepper

17 responses

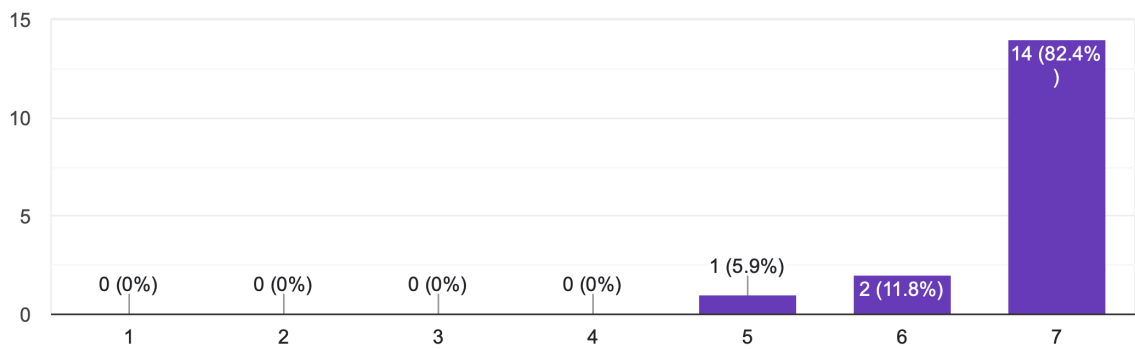

### CO2 laser partial arytenoidectomy- Y.Karagama

17 responses

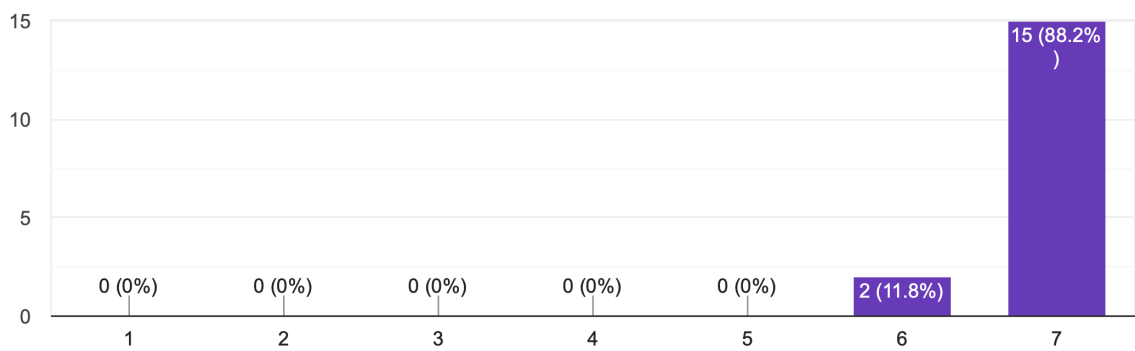

### Lateralisation suture vocal cord- Y.Karagama

17 responses

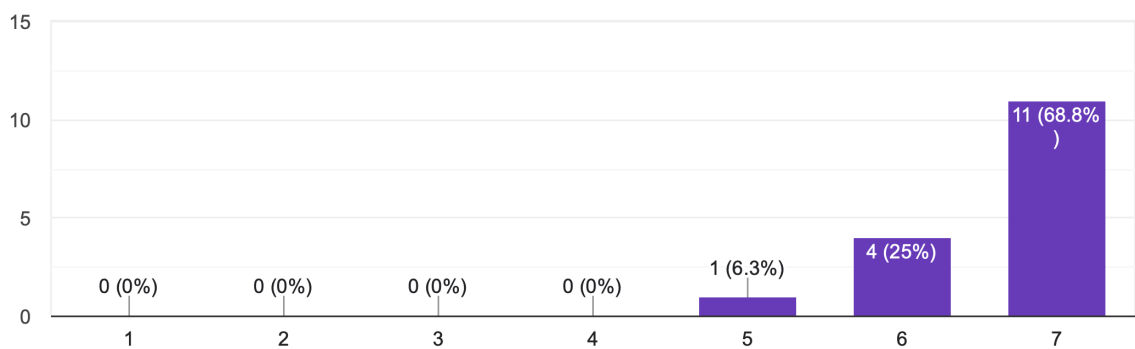

### Laser pharyngeal pouch- M.Watson

17 responses

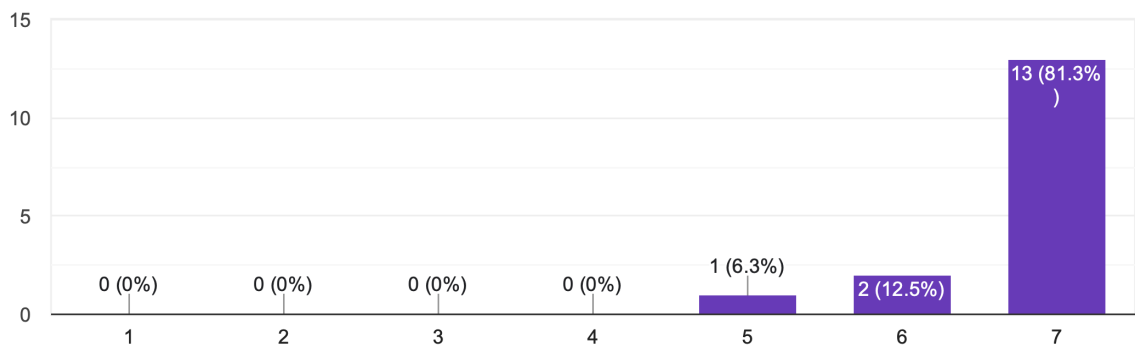

### Dissection A: Laser laryngeal surgery

16 responses

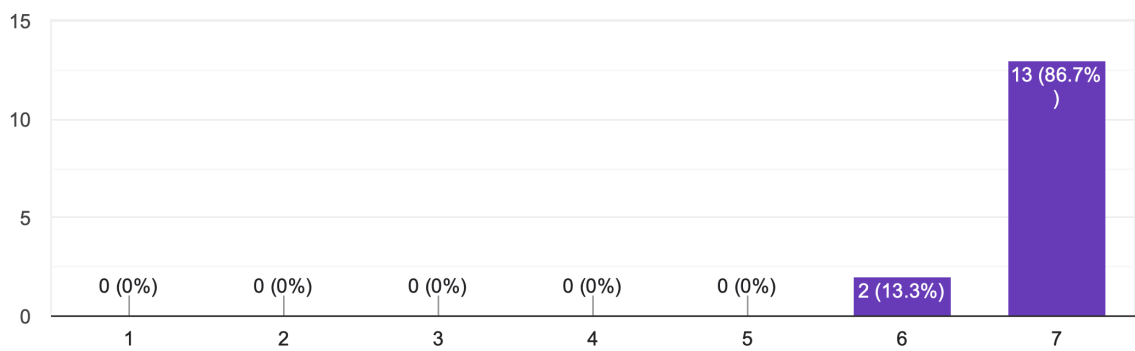

### Dissection B: LTR, CTR, Rib graft

16 responses

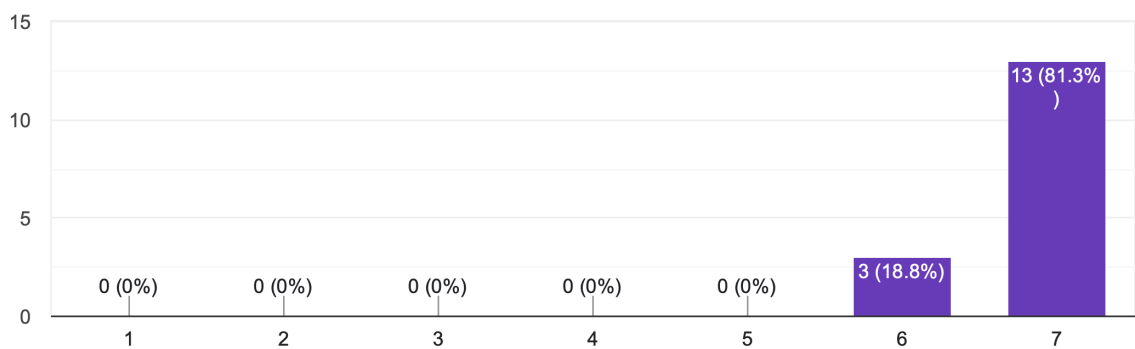

### Venue of the meeting

15 responses

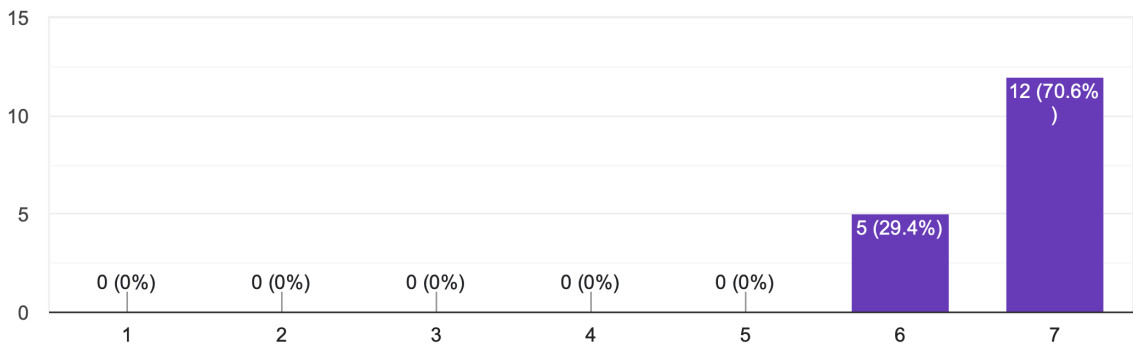

### Overall score of the meeting

16 responses

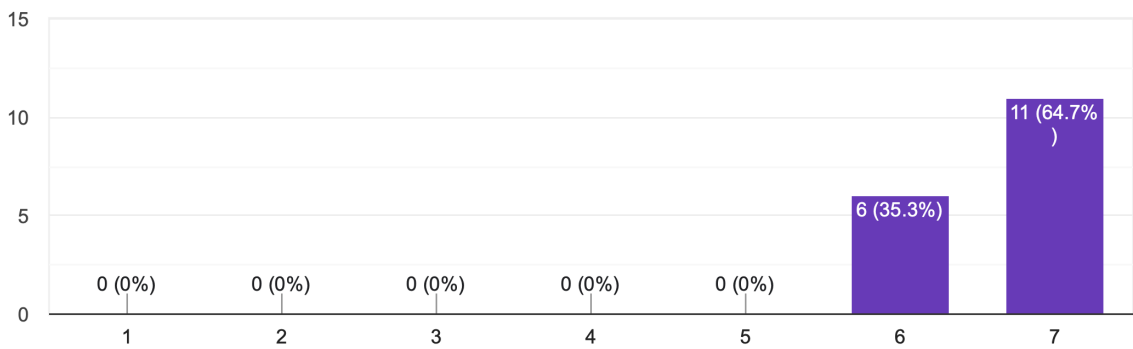

### The course will improve my practice

17 responses

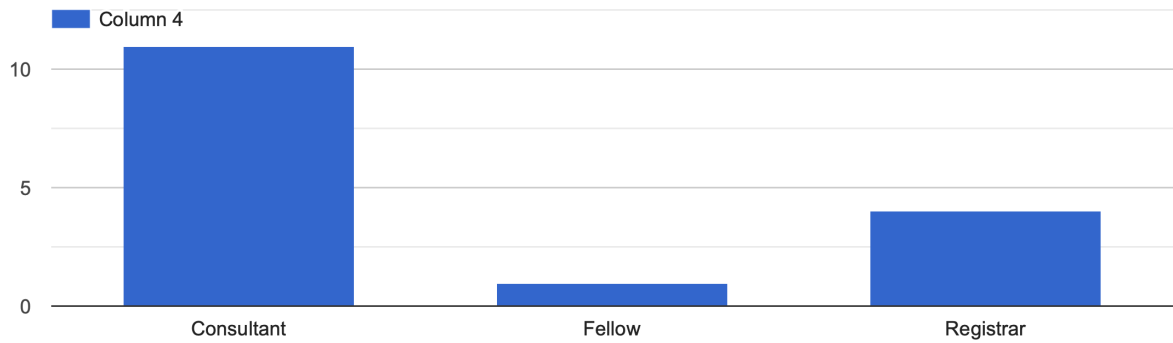

### What I have gained from the course will benefit my patients

17 responses

### Your grade

## Additional comments

- Day 1 was well balanced. Right amount of information. You may add a similar description for the way to go to the Hodgkin's building as you did for the Roben's suite. Great Course, thank you very much!. Bit more time for the dissection and maybe a small script ( Just a bit more structured and it is possible to read the script the evening before to prepare). The lecturers/instructors were very dedicated- Thank you for that !. I think it will be sufficient to have an instructive video instead of a live presentation- You will save one cadaver.
- Excellent faculty and wide international perspective on airway management. Leant a great deal. Thanks for organising
- Excellent course, faculty, lectures, dissection, venue, equipment, catering, meal. Thank you. Will recommend the course to others to attend
- Quality of lectures largely exceeds my expectations. Enjoyed the balance of Paeds and adults, and in addition of an anaesthetist. LTR dissection etc would have worked a little better with additional stronger headlight (spot light)
- All aspects were great but we wish if one laser machine similar to the one in real theatres to know the setting. Thank you
- Had some issues with the microscope, laser and suction
- Great faculty, great programme
- A little rush through the lectures, but I can't cut anyone out. Always amazing with so many faculty in the dissection room. They really know a lot. Laser dissection we had too much problems with the suction and no screen on the microscope which made instructions difficult. We lacked the instruments for lateralisation.
- Would add number of slots for dissection
- Great course
- Everything perfect
- Sometimes the videos or photos are small to see in the screen ( but we have the slides to see at home. Thank you
- Excellent course. Well organised. It is a pleasure being here. It's not easy to find an airway course of such level. Thank you
- Excellent course, very well organised. High quality lectures- Well illustrated by images and videos of good quality. Enough room/time for questions and discussions. Great demonstration of LTR/CTR in dissection room. I can't think of any tips for improvement. more dissection places in the future but actually the small scale of the course is actually very inviting for questions and discussions etc. Thank you.
- Since it's a laser course it is expected to do more laser stuff. You may consider to split the course laser and airway reconstruction since it is way too much of information to practice on the dissection day. More laser in local anaesthesia. Live demonstration ? Overall on interesting meeting/course. Nice to see and meet people from many countries. Do not take my feedback as I was dissatisfied, but see that as a constructive opinion. Thank for everything
