## Overall score of the meeting

16 responses

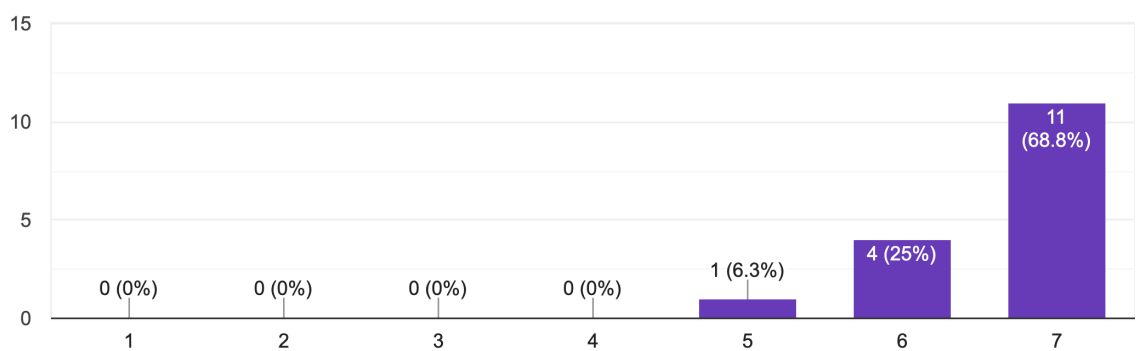

## Benefit to patients

16 responses

## The course will improve my practice

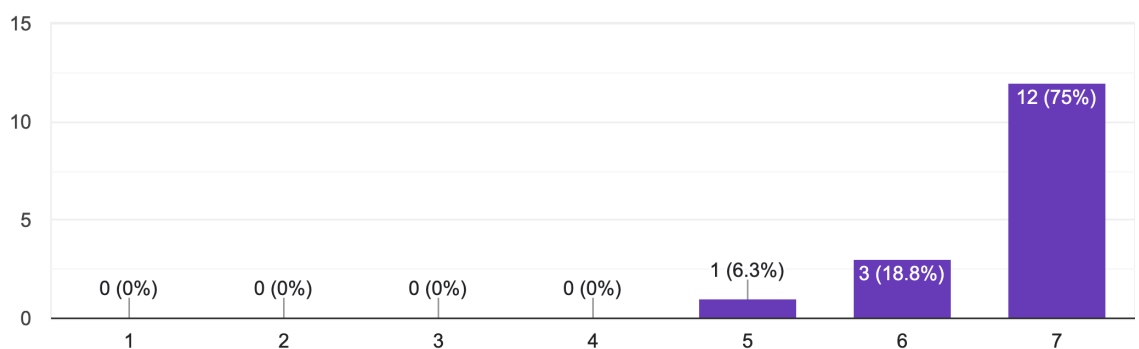

16 responses

## Delegates feedback: 2nd London Phonosurgery course 2-3rd Aug 2022

### What I have gained from the course will benefit my patients

16 responses

### Additional information

- Adding another lecture about stroboscopy interpretation. Method of payment if can be done electronically will be much better
- Not enough dissection time- didn't get chance to do all the framework surgery-just type 1 & 2. Thanks for a good course.
- Very well organised. Our cadaver was a bit thin and dry so reinnervation was not very clear but that was bad luck. Learnt a lot from this course. Thank you
- More comprehensive discussion of all available implants. Many thanks for an excellent course. I hope to see you soon
- Fantastic course, thank you
- If the videos can be included on the USB or if can be made available online before along with lectures. I didn't find the pigs larynx very helpful
- Make it more frequent and announce to people early. Virtual courses will be nice
- Good course. Limited time for hands-on in relation to cadavers, but the overall great comments from the faculty
- Very organised, beneficial, everything was perfect. if you provide online payment of paypal it will be more convenient
- Great interaction sessions especially the Q&As. I wish I brought my loops!
- Excellent course, really informative, great mix of lectures and dissection
- Maybe advise us to inject with saline first to avoid clogged needles. When there are 4 people on 1 head maybe have 2 people do laryngeal framework prep and the other team carve the silicon. Tracy's amazing. There is definitely enough walking round during the dissection
- Would be better with more cadavers as sharing is not optimal (but understand supply is an issue). Very useful and fact packed course. Will change my practice
