

1st London Laser laryngeal and Airway course 22-23/11/21

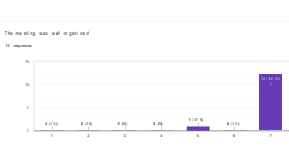

Delegates feedback-14 responses

Summary Question Individual

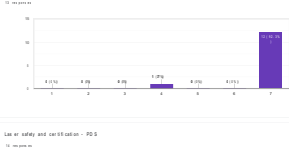

The aims of the meeting were all defined: 1=less satisfied, 7=Extremely satisfied

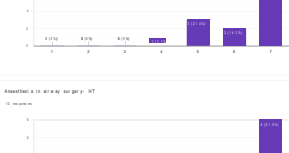

The defined aims of the meeting were achieved

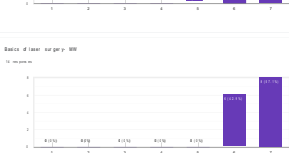

The meeting was well organised

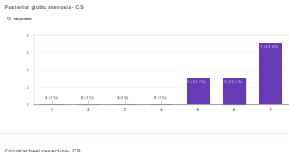

The course fulfilled my educational requirements

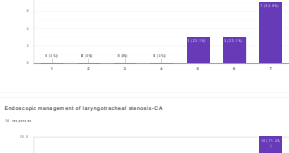

Laser safety and certification - PD S

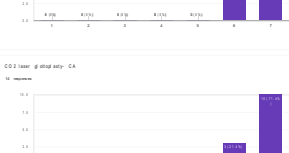

Anastomosis airway surgery- RT

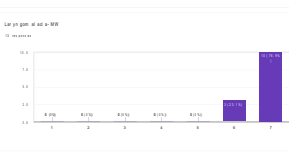

Basics of laser surgery- MR

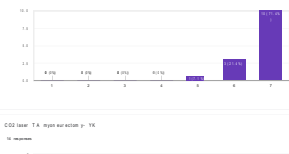

Posterior glottic stenosis- CS

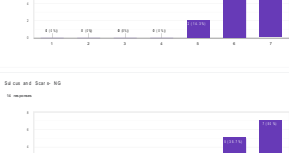

Cricotracheal resection- CS

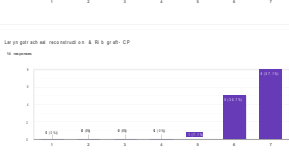

Endoscopic management of laryngotracheal stenosis- CA

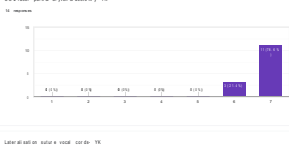

CO2 laser glottoplasty- CA

Laryngomalacia- MR

Office laser office procedure- YK

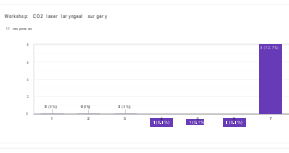

CO2 laser TA myectomy- YK

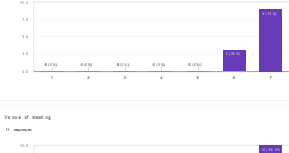

Silica and Scar- NG

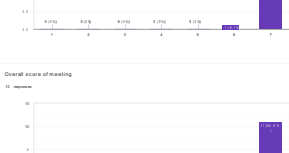

Laryngotracheal reconstruction & Rib graft- CP

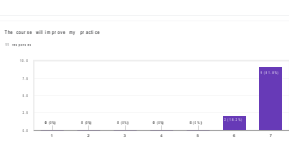

CO2 laser partial arytenoidectomy- YK

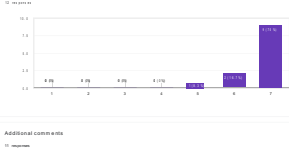

Lateralisation of vocal cords- YK

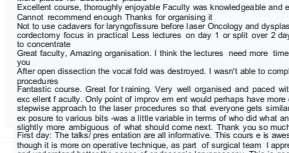

Laryngomalacia- MR

Faculty room facilities

Workshop: CO2 laser laryngeal surgery

Workshop: Open laryngeal airway dissection

Value of meeting

Overall score of meeting

The course will improve my practice

What I have gained from this course will benefit my patients

Additional comments

Well organised course, I really like. Thanks for the speakers, administrators and anyone who help at this course. Very nice cadavers.
More places for dissectors please
Excellent course, thoroughly enjoyable Faculty was knowledgeable and excellent
Cannot recommend enough Thanks for organising it
Not to use cadavers for laryngofissure before laser Oncology and dysplasia and cordectomy focus in practical Less lectures on day 1 or split over 2 days.Difficult to concentrate
Great faculty, Amazing organisation. I think the lectures need more time. Thank you

After open dissection the vocal fold was destroyed. I wasn't able to complete all procedures
Fantastic course. Great for training. Very well organised and paced with excellent faculty. Only point of improvement would perhaps have more organised stepwise approach to the laser procedures so that everyone gets similar exposure to various bits -was a little variable in terms of who did what and slightly more ambiguous of what should come next. Thank you so much
First day: The talks/ presentation are all informative. This course is awesome, though it is more on operative technique, as part of surgical team I appreciate and understand better the scope of endoscopic laryngoscopy. This is good to attend as it enables us to do better in our speciality. And thanks for organising this.

Very good presentation- Clear & precise teaching Thank you for once in a lifetime opportunity. Very interesting- Requires more time
Congratulations to all the team and especially Tracy
Dissection manuals with pictures would be helpful with step by step points

Your grade
