Additional comments

- It was a little bit confusing when to switch stations in the practical hands-on part. Very good lectures very important themes. Thank you for developing the field. Also, very good atmosphere. And good food. And good instructions to get here. Thank you.
- Please notify me of any future courses
- Thanks, we learned a lot from this course. I appreciate all the effort
- Thank you!
- Very well organised. Lectures were very relevant and interesting. Great introduction to TNO thank you. There is a lot of demand for the course, so multiple courses will be definitely welcomed and filled. Thank you for adding me on!
- Very interesting course. I would have preferred more time on the mannequin
- More time to practical
- Loved the practice sessions! Great opportunity to ask questions and practice- Jason Dunn fantastic speaker. Physiology lecture may have needed to be more practical simpler for better understanding
- Clip microphone to make easier for speaker
- Great course. More hands-on practical sessions would have been better. Rooms were freezing cold at the window side all day. Poor time keeping off lectures which reduced time spent on practical sessions
- Would have liked more time on blue laser to see what it can do
- Well organised. Good course. TNO clinic setup would be useful
- Lectures a little long. Equipment could have set up better mic/screen flicking
- Some of the talks could have been shorter to allow us time for practical
